

John Wickham, DipLA, MLI

Director

Diploma in Landscape Architecture 1983
Member of the Landscape Institute 1987

John is responsible for the practice structure and management of day-to-day activities at Murdoch Wickham. He has an overview of all schemes and is responsible for large-scale landscape masterplanning projects, visual assessments, project co-ordination, planting design and the development and implementation of information technology within the practice.

His particular interest lies in soft landscaping and the implementation of quality public realms. He has in depth knowledge of the nursery trade and in particular those that supply semi mature trees in the UK and abroad. He has extensive experience of the planting and successful establishment of large trees on brownfield sites, giving these developments immediate impact and sense of space.

John has a practical innovative approach to projects that gives clients the confidence that their schemes will be delivered cost effectively while committed to quality design.

Selected Project Experience

Residential

Ingress Park, Greenhithe - brownfield residential development 950 units, masterplan support, design and implementation.
